

LECTURE

HEALTH FOR ALL BY THE YEAR 2000

"NOW IS THE TIME TO DREAM
AND TO STRETCH SO THAT
'HEALTH FOR ALL BY THE
YEAR 2000' BECOMES AN
ACHIEVABLE GOAL OF THE
GLOBAL VILLAGE"

Sister Rosalie Bertell is Director of Research for the International Institute of Concern for Public Health in Toronto, and is one of the founding Commissioners of the International Medical Commission in Geneva, which will work with health professionals to secure human rights for all people. She brings to the Canadian Institute a broad knowledge of the fields of environmental and occupational health, and experience gained by frequent travel in Europe, Asia, the Pacific Islands, Australia and North America. Dr. Bertell is Editor in Chief of International Perspectives in Public Health, and author of "NO IMMEDIATE DANGER: Prognosis for a Radioactive Earth" the Women's Press Ltd., London, England, April 1985. She has begun a program of Medical Assistance to the people of Marshall Islands and works by preference in behalf of indigenous peoples and citizen groups most severely affected by militarism and pollution. She is optimistic. The crisis is a call to grow, not a death knell.

"WHERE IS THE VOICE
FOR A HEALTHY LIFE STYLE,
FREE FROM INNER SICKNESS
OF HATRED AND REVENGE,
FREE FROM DEBILITATING
EFFECTS OF TOXIC POLLUTION?"
